

Acknowledgements

I would like to first thank my Final Year Project supervisor, my Faculty Academic Advisor, and director of HKU AIoT Lab, Professor Chenshu Wu. Since I joined the lab as a student research assistant in June 2023, he provided patient and continuous guidance on various aspects of my study and research, which is way beyond this project. Moreover, I want to thank Mr. Sheng Lyu, PhD candidate at HKU AIoT Lab, who is a great mentor and friend. I gained a lot of experience and skills from his hand-to-hand guidance and insightful advice on this project and other research topics during the past two years. In addition, I would like to thank other members and alumni of the AIoT lab, for their help since I joined the lab.

Meanwhile, I would like to express my gratitude to all of my friends and fellow students. Here, I want to make special thanks to some of my friends at HKU, including Jiahao Gan and Ruidi Luo, who are and will continue to be my best friends; Xinyue Yu for her invaluable help and warm advice throughout our undergraduate study; Entong He, who always stayed up late with me together at our department's computing lab; as well as Jieyi Zhao, Yuxuan Chen and many others. I would also like to thank Zhuoyi Xiang at University of Waterloo and Yilin Jiang at University of Toronto Mississauga. Knowing them since middle school, they made my exchange study in Canada an unforgettable experience.

Finally and most importantly, I want to express my sincere gratitude to my beloved parents for their love and support throughout my life, and my two sisters, Yueke at HKU and Yueyue at City University of Hong Kong, for their irreplaceable encouragement and help not only in my study but also in my life. Thanks to other family members for their help as well.

Thanks to all of you who have been with me!
